

Floor Scraping Systems

HIGH VOLUME RIDE-ON SCRAPER

BMS-L1950

The BMS-L1950 is an economical, entry-level floor scraping machine. Designed for large area surface removal, this extremely mobile, highly productive, ride-on floor scraper will make short work of tough floor removal jobs. Remove a wide variety of thick coatings, floor coverings, and waterproofing membranes with the BMS-L1950, including carpet, VCT, tough ceramic tile and hardwood.

A compact design with large diameter wheels offers greater efficiency with increased travel speed, and precision hydraulic steering gives the operator optimum control and maneuverability. A patented "floating" blade design with heavy-duty pivot points, on the 3-action blade clamp, insures the best performance from multiple blade types.

The 25 hp Kohler engine delivers the power that's demanded for those stubborn and time consuming floor removal jobs. The BMS-L1950's weight can be reduced by 565 lbs. when necessary for less demanding work.

The BMS-L1950 ride-on scraper brings you the quality and durability you can trust, that is the hallmark of Blastrac.

BMS-L1950
Ride-On Scraper

Motor area is easily accessible for maintenance procedures.

Special dolly for easing over thresholds is included.

Always wear appropriate eye, ear and respirator protection for the application, as specified by OSHA regulations and your employer. Never operate or maintain equipment before reading and understanding the instructions for operation and maintenance. Obey all safety signs and instructions while operating or maintaining equipment.

BMS-L1950

FEATURES & BENEFITS:

- More compact for small rooms
- Precision hydraulic steering for maneuvering in restricted spaces
- Heavy-duty, pivot points on 3-action blade clamp
- Patented "floating" blade design
- Removable weights reduce weight to 1385 lbs.
- Ideal for tough removal jobs in malls, airports, hotels, schools, hospitals, and food service industries
- Single lever steering to minimize operator fatigue
- Built-in rear wheel scrapers help improve traction by reducing debris build-up

SPECIFICATIONS:

Working Width: 26 in. (660mm)
Tool Width: Blade dependent
Fuel: 20# liquid propane tank
Engine: 25 hp Kohler.
Max. Ground Speed: 320 ft. per min.
Dimensions: L 51 in. (1295mm) x W 26 in. (660mm) x H 55 in. (1397mm)
Weight: 1950 lbs (885kg),
1385 lbs w/o weights
