

STORM

✚ Precise single handle hydraulic steering with your right hand allows you to adjust the blade height and pitch with your left hand on the go without stopping.

✚ 250 ft./min run speed is twice as fast as similar floor scrapers. All day scraping doesn't have to come at a turtle pace with this machine.

✚ A very efficient electric motor and hydraulics allows for 8+ hour run times on an overnight charge from a standard 120v plug in.

✚ The on-board battery charger has charging progress indicator lights as well as Bluetooth capability. View charging logs, battery voltages, and more right from your phone up to 100 ft. away.

✚ A built in toolbox allows you to store extra blades, tooling, and wrenches giving you everything you need right on the machine.

✚ The on-board battery fuel gauge lets the operator know how much battery life is left as well as keeps track of the run time hours. It also plays a vital role in shutting the machine down before the batteries are drained to a damaging level.

| Technical Data | |
|--|-----------------|
| Item: | STORM |
| Speed: | 250 ft./min |
| Dimensions: (LxWxH) | 58" x 25" x 57" |
| Complete Weight: | 2,620 lbs. |
| Removable Weight: | 550 lbs. |
| This machine comes standard with all weights, a 12" blade holder, a tile tooth attachment, a tungsten carbide-tipped tooth, and a transport dolly. | |
