

# ATTIC VAC JR. VERMICULITE REMOVAL SYSTEM

[www.ruwac.com](http://www.ruwac.com)  
**RUWAC USA**

## INTRODUCING RUWAC'S NEW "ATTIC VAC JR"

Our Attic Vac JR can eliminate the need for multiple operators using shovels and "shop vacs" with limited capacity and short hoses. Save on labor and increase your production!

The Attic Vac JR Vermiculite Removal System is Ruwac's solution to safely handle vermiculite and potential asbestos containing materials in a compact package. The Attic Vac JR features a heavy duty 110 Volt industrial vacuum with a powerful 200CFM @ 97" H2O. Utilizing 75' of 2" hose, this system contains and filters harmful materials into a 30 gallon HEC Cyclone pre-separator.

The Attic Vac JR Vermiculite Removal System is designed in a smaller package for increased portability, ease of breakdown and getting close to the source or in tight spaces.

\*For larger diameter hose, longer hose lengths, and increased capacity and production ask us about our Attic Vac PK 220V system.

Ruwac's versatile vermiculite vacuum package is designed for small projects, is easy to transport and is also great for asbestos abatement, mold & lead remediation, demolition, surface preparation, and post construction project clean up.

## #ATTICVACJR-PK - COMPACT VERMICULITE REMOVAL SYSTEM
