

# HOSE HANGER & TOOL BASKET

## TOOL MANAGEMENT FOR Ruwac VACUUMS

Many of Ruwac's vacuums are already completely portable, but sometimes a bit of organisational help can go a long way in making moving your machine around easier while on the job. That's why Ruwac offers two great accessory management solutions with its hose hanger and tool basket options. These accessories are available at the factory installation level and respectively attach to your vacuum's housing, assisting with the efficient storage of other Ruwac's vacuum tools and parts.

### TOOL BASKET

- Holds all standard vacuum tools sold as standard packages
- Includes bolts to securely attach to the housing of your vacuum

### HOSE HANGER

- Helps you to avoid getting caught up in long, loose hose lengths while your vacuum is in use
- Provides a quick and compact storage solution to your hosing without the hassle of tangled lines
- Stainless steel construction mountable to your vacuum with bolts

#### TOOL BASKET

|          |  |
|----------|--|
| 25176    | Basket without mounting hardware                                       |
