# Take the **POLISHED CONCRETE OVERLAYMENTS COURSE** and receive Continuing Education Units (CEUs)

## Learning Objectives

- Identify and recognize the characteristics of low moisture, fast curing self-leveling overlayments that can be polished to create a final finish.
- Investigate the design potential and innovative opportunities in using polished concrete overlayments in a variety of commercial, industrial, and residential buildings.
- Assess the functional contributions of polished concrete overlayments for their contributions to green and sustainable building design.
- Specify polished concrete overlayments with a variety of properties and formulate appropriate selections related to specific applications.
