

TC-7 STAND-UP EDGER

The Stand-Up Edger was designed for grinding concrete surfaces near walls and other vertical surfaces. This grinder can be used indoors or outdoors and small or large spaces. The Edger allows for use with a dust collection system for a clean, dust free work environment. The ergonomic controls provide the operator with total control of the pressure of the grinding wheel.

Features

- Durable, aluminum chassis
- Powered by Metabo's 24-230 15 amp electric grinder
- Heavy duty casters roll over cords and jobsite debris easily
- U-shaped frame puts the operator in a comfortable working position
- Adjustable outrigger wheel for various head pressure
- Forward control handle is supported by gas shocks for smooth operation
- Front, back, and side to side "on the fly" adjustment gives the operator "Total Control"
